How To Read The Dossier

A few terms that will be helpful to understand as you read your dossier.

Brand Foundation

Your brand foundation is what you naturally and unconsciously communicate to the world. The clearer it is, the better your interests, instincts, and values work together to give your brand a solid base to build on.

Archetype

In psychology and storytelling, archetypes are familiar human patterns. This is particularly useful to know as you build your brand because it helps make your brand feel consistent and gives your brand a recognizable role. It helps people understand what they can expect from you and gives your voice, content, and visual choices a consistent direction.

Visual Identity

The logo, colors, photographs, and type that make a brand recognizable. Photographs show your colors in real settings, the way people will meet them, beyond the logo, the words, and blocks of color. Used the same way every time, these elements help people recognize you quickly.

The Niche Gap

Real research into what actual questions your audience is already asking. Especially the questions they're not getting good answers to. Those gaps show you where there is room to say (or show) something useful and specific without repeating what everyone else is already saying. To stand out. An opportunity to become the authority within your niche.

Contrarian Belief

Something you believe, based on real experience, that goes against what most people in your niche currently say. These are listed because a contrarian belief stated clearly and often is one of the fastest ways an audience remembers who you are.

Content Pillars

A content pillar is a core topic that supports everything you publish. Every blog post, video, newsletter and social media update links back to one of your pillars. Your pillars appear later in this Dossier, drawn from your questionnaire answers. They keep your message focused, and build authority around your expertise.

PRIVATE · DAMON KENRICK © 2026

Brand Overview

You're making an AI animated science fiction film in public, and you know how to teach. Your brand puts those 2 abilities together: the film people watch and the lessons that show how you made it.

What is working

You already have a recurring character, finished scenes, a title sequence and a theme song on YouTube. You also hold a Master's degree in Instructional Design and have 12 years of teaching experience. Few AI filmmakers have both a real project and the training to teach from it.

What is holding you back

Right now the film and the teaching share one channel without clear labels. A new viewer can't tell whether a video is a scene to enjoy or a lesson to learn from. Give every upload one job, name that job in the title, and point viewers to the matching next video.

Your archetype: The Witness

The Witness pays close attention to what other people see and understand. For Roxie Moonlight, that means showing viewers the decisions behind each scene so they understand how an AI film is made, step by step.

Your primary themes

Five themes run through your work: building imagined worlds, trying new tools early, explaining what you discover so other people can repeat it, telling stories with warmth, and sharing what you find so other people can see it too.

PRIVATE · DAMON KENRICK · © 2026

Signature Traits

These 3 traits show up in every scene you make and every lesson you could teach from it.

World builder

You admire Walt Disney, who built whole worlds for audiences to enter. Roxie's desert planet, crashed saucers and alien market are the start of that kind of world. Keep a written record of Roxie's places, rules and characters so every new scene fits the ones before it.

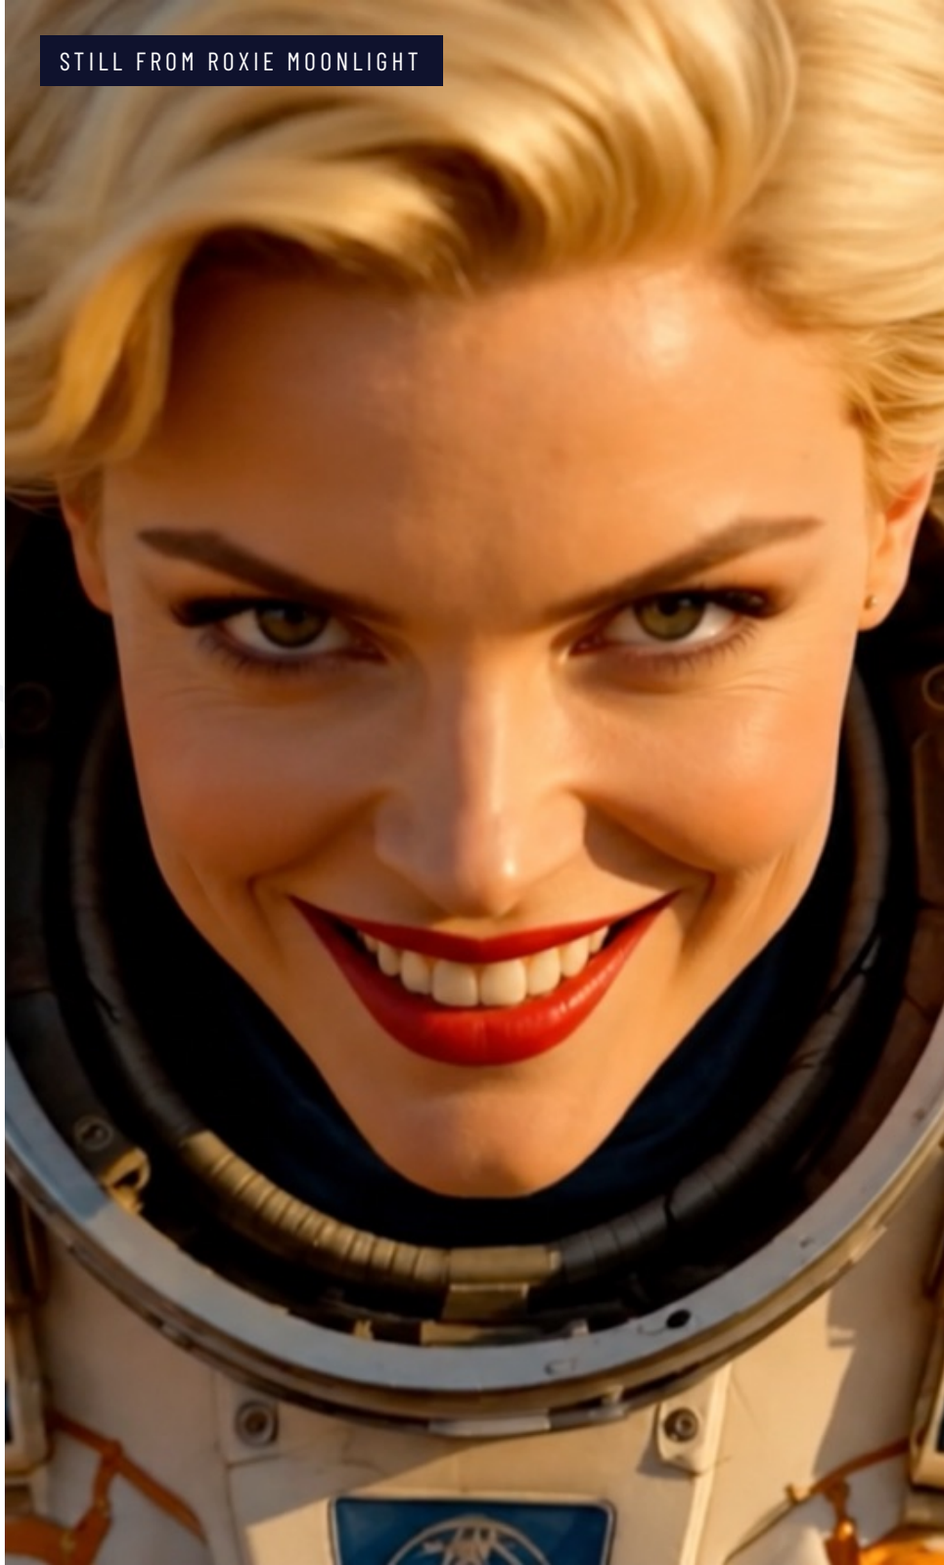

Explorer

You admire Jacques Cousteau, who filmed places few people had seen so everyone else could see them too. Treat each new AI tool the same way. Try it on a real Roxie scene, record what happens, and share the result with your audience.

Teacher

Your instructional design training gives you a way to turn a messy creative process into clear steps. Each production lesson can have one goal, a short demonstration and a task the viewer can try on their own project.

PRIVATE · DAMON KE

STILL FROM ROXIE MOONLIGHT

STILL FROM ROXIE MOONLIGHT

ROXIE MOONLIGHT

Signature Traits

These 3 traits decide how your audience will feel about you and about the film.

Patience with beginners

You notice where a learner gets lost. Many AI tutorials move fast and skip steps. Slow down at the step most people miss, and explain the reason behind it.

Reach in 3 languages

You speak English, Spanish and Portuguese. Roxie Moonlight can reach 3 language audiences with dubbed or subtitled versions of the same scenes and lessons, and you can voice and check each version yourself.

Warmth on screen

You admire Olivia Dean, who sings about feelings openly. Bring that warmth into Roxie's story and into your narration. Viewers stay with a character they care about and a teacher who sounds like a real person.

© 2026

ROXIE MOONLIGHT

Core Essence

This is how your voice should sound in every narration, caption and lesson.

Your core essence

You help people understand how a new tool or process works, and you take the time to show them. Roxie Moonlight gives you a real project to show, scene by scene.

Put it into words

Name the scene, explain the choice you made and show the result. Speak at a steady pace. Talk to the viewer the way you'd talk to one student sitting beside you.

STILL FROM ROXIE MOONLIGHT

PRIVATE · DEMON K

YOUR BRAND ARCHETYPE

The Witness

Use this role to decide what you make, how you explain it and how you answer your audience.

The fit

The Witness notices what other people see and helps them see more. Most viewers of an AI film only see the finished scene. You can show them the prompts, the failed attempts and the fix that worked.

What this means for social media

Post the finished scene first, then a short clip that shows one decision behind it. Read the comments for repeated questions. When 3 or more people ask the same question, make that question the next lesson.

Use it when you choose content

Build each video around one scene and one technique, such as keeping Roxie's face the same across shots, matching light between frames or timing music to action.

Use it when you choose your voice

Use plain names for tools and steps before you use technical terms. When you use a technical term, explain it the first time it appears.

PRIVATE · DAMON KENRICK © 2026

Your Brand Archetype

Before you publish, check that a viewer can tell what kind of video it is and where to go next.

Putting your archetype to work

Give every video one label: Episode, Behind the Scene or Lesson. Put the label in the title and on the thumbnail. End each video by pointing to the matching video with another label, so a viewer who enjoyed a scene can find the lesson and a learner can find the scene.

For Roxie Moonlight

Keep the episodes as pure story, with no teaching voiceover on top. Put every explanation in the Behind the Scene and Lesson videos, so the film stays enjoyable on its own.

STILL FROM ROXIE MOONLIGHT

PRIVATE · DAMON K

Content Ecosystem

Primary Content Pillars

Pillar 01 · The film

Episodes and finished scenes of Roxie Moonlight. These videos build the audience that cares about Roxie and wants to see what happens next.

Pillar 02 · Behind the scene

Short videos that show how one scene was made: the idea, the tools, the attempts that failed and the version you kept. These videos turn viewers into followers of your process.

Pillar 03 · AI filmmaking lessons

Step by step lessons built from real Roxie scenes. Each lesson teaches one technique a viewer can use on their own project. These lessons lead to your paid products later.

Secondary Topics

Character consistency, voice and dubbing, music and sound, editing, story structure, and the tools you use for each step.

PRIVATE · DAMON KENRICK · © 2026

Content Ecosystem

Proof Points

Your YouTube channel already shows Roxie Moonlight scenes, including First Mission and Getaway, with a recurring character, a consistent science fiction world and a chrome title sequence. Your Master's degree in Instructional Design and 12 years of teaching show that you know how to teach.

Stories to Document

How Roxie's look was chosen and kept the same across scenes. A scene that failed and what you changed. How you made the title sequence and the theme song. The first time a new tool worked on a Roxie scene.

Contrarian Belief

An AI film is worth watching when a person makes the story decisions. Show your audience the choices behind each scene so they can see that Roxie Moonlight is directed by you.

Contrarian Belief

The failed attempts are the most useful part of a lesson. Most AI tutorials show only the perfect result. Showing what went wrong teaches beginners how to fix their own work.

PRIVATE · DAMON KENRICK · 2026

THE BLIND SPOT

Roxie Moonlight is your teaching portfolio.

You may see the film as a creative project that sits beside your teaching work. The film is the strongest proof of your teaching that you have.

What the research found

A September 2026 research pass looked for creators who document the making of one original AI film over time. It found tutorial brands, such as AI Filmmaking Academy and AI Filmmaker's Lab, and single short films. It found no creator teaching from one original film as an ongoing series.

Why it matters

A course buyer or a brand sponsor wants proof that you can do what you teach. Every finished Roxie scene is that proof. When the film and the lessons share one name, each new scene adds to your standing as a teacher.

Put it to use

Name your teaching series after the film, such as Building Roxie Moonlight, and link each lesson to the scene it came from.

STILL FROM ROXIE MOONLIGHT

PRIVATE · DAMON KEN

STILL FROM ROXIE MOONLIGHT

ROXIE MOONLIGHT

Visual Identity

For Roxie Moonlight, use the character and the film's own settings to establish the visual direction.

Mood and keywords

Adventurous, cinematic, curious and retro-futurist. Rounded chrome lettering, deep space, luminous blue, violet, weathered spacecraft and wide desert light give you a specific visual vocabulary.

Photography and frame selection

Choose frames that show a clear subject. Pair a close character portrait with a wide environment and a scene with action. Keep faces, vehicles and important story details large enough to read.

N KENRICK © 2026

Visual Identity

Your film provides both bright desert scenes and darker interiors. Let each scene retain its own lighting.

Editing style

Protect detail in the white spacesuit and the darker ship interiors. Keep skin tones consistent across adjacent portraits. Use the blue and violet of the title for supporting graphics, while preserving the color of the film frames.

Color direction

Midnight blue anchors the identity. Electric blue and violet connect it to your existing chrome title. White gives text and diagrams a clear surface. Let the desert tones remain part of the images.

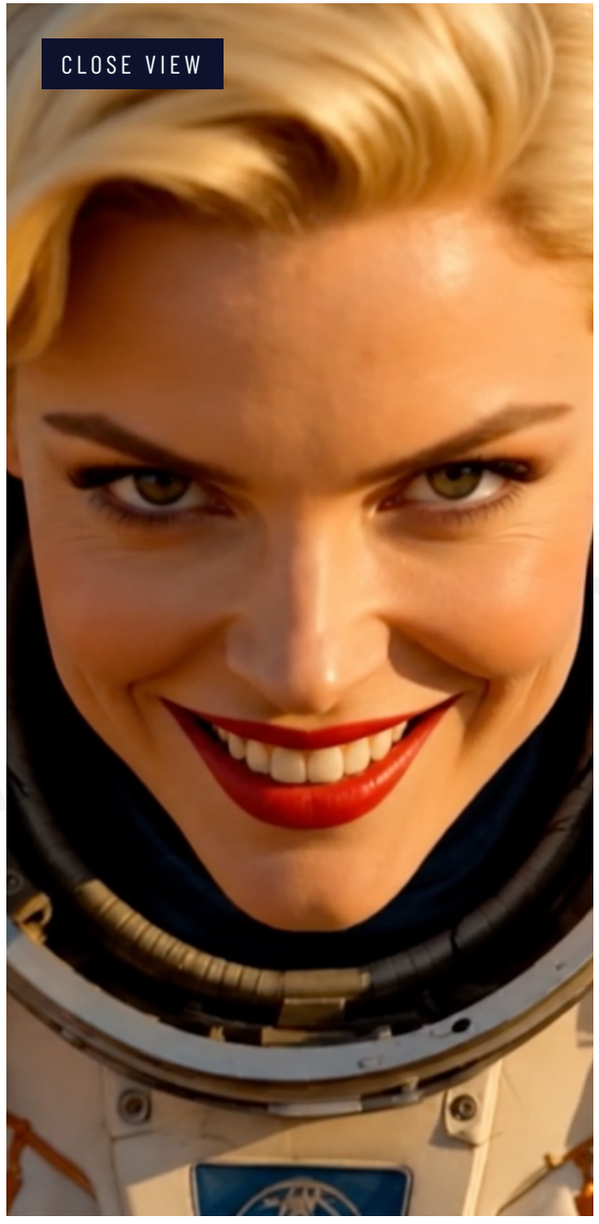

STILL FROM ROXIE MOONLIGHT

PRIVATE DAIMON KO

Your Visual World

Use the close view to introduce Roxie, the wide view to establish her world and the interior to change the pace.

Document and reading surfaces

The blue and violet are drawn from the appearance of your existing film title, with midnight as the dark anchor and pure white for reading. Use these values consistently in supporting artwork. The chrome title itself remains a separate graphic treatment.

Using Your Colors Together

See each color beside the others, then use the readable pairings for text.

White on midnight gives the logo and title a clear background. Keep the film frame in its own colors. Use blue and violet for supporting graphics and selected headings. Body text: 4.5:1 contrast or higher. Large text: 3:1 or higher. Graphics-only pairs show the color relationship and should not be used for essential text. Large text means at least 18 pt regular or 14 pt bold.

ROXIE MOONLIGHT

Your Roxie Moonlight Logo

The rocket and open crescent give you a compact mark that can accompany the full title. The rounded lettering keeps the supporting identity close to the film's retro science-fiction character.

Use the primary arrangement when the name is being introduced and you have enough vertical space to show both the symbol and the lettering clearly.

PRIVATE · DAMON KENRICK · ©2026

BADGE / BLACK
Square placements

BADGE / WHITE
Square placement on dark backgrounds

Your Roxie Moonlight Logo

Clear space

Leave clear space around the logo equal to at least the height of the letter O in ROXIE. For the symbol alone, leave a quarter of its width clear on every side. Keep text, trim edges and other graphics outside that area.

Light and dark backgrounds

Use black on white or a light, quiet area. Use the white version on midnight or a dark area with enough contrast. If a film frame is busy, place the logo in a separate clear area.

Size and placement

Use the full horizontal name at 200 pixels wide or larger on screen. Use the symbol at 32 pixels or larger. Start print proofs at 45 mm for the full name and 12 mm for the symbol, then check the actual printed result.

Files and handling

SVG scales cleanly for digital layouts. Transparent PNG works where a tool asks for an image. PDF provides a vector version for print layouts. Keep the proportions fixed, the symbol upright and the crescent intact.

PRIVATE · DAMON KENRICK · 2026

ROXIE MOONLIGHT

Logo Applications

These mockups show the channel, a T-shirt, and a water-bottle sticker. Use the separate vector logo artwork for production. Vendor dimensions, materials and print proof remain production decisions.

Proposed applications. Mockups show placement, not produced items.

ROXIE MOONLIGHT

Your Existing Title

Use your chrome title artwork for the film's title presentation. Use the simpler black or white logo where you need a clear name or compact symbol, such as a document, channel graphic or small application.

Keep the original title as supplied. The rounded supporting lettering is a companion treatment; the exact typeface used in your chrome artwork is still unconfirmed.

The Brand Typography

ROXIE MOONLIGHT

OXANIUM SEMIBOLD / 600

Use Oxanium for the main headings. Its squared curves and open forms suit the science-fiction setting, while the spacing gives a short headline room to read.

THE NEXT SCENE STARTS HERE

BARLOW CONDENSED REGULAR / 400

Use Barlow Condensed for short subheadings, episode information and labels. Its narrower letters give supporting information a different scale without competing with the main title.

Aa

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789 &

Aa

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz 0123456789

PRIVATE · DAMON KEN

The Brand Typography

Use Source Sans 3 Regular for research, instructions and sustained reading.

Your reading face

Its open shapes and regular width give longer sentences room to breathe. Use sentence case for paragraphs and keep lines to roughly 45 to 75 characters where the layout permits.

Sizes and spacing

Start screen body text at 18 pixels with 27-pixel line spacing. For print, start at 12 points with 17-point line spacing. Use Oxanium at 32 to 48 pixels for main headings and Barlow Condensed at 22 to 26 pixels for short subheadings.

Aa

Use the same logo, colors and font roles each time you prepare a new piece of Roxie Moonlight material.

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz 0123456789

PRIVATE · DAMON KEN

Using Type and Color Together

Hierarchy and case

Use Oxanium 600 for the main heading and Barlow Condensed 400 for short supporting lines. Set longer text in Source Sans 3 400. Use uppercase for brief labels; sentence case keeps explanations comfortable to read.

Spacing and repetition

Leave a clear gap between a heading and its paragraph. Keep the same type roles across your channel artwork, documents and teaching materials. Use one accent color in a layout, with images supplying the remaining color.

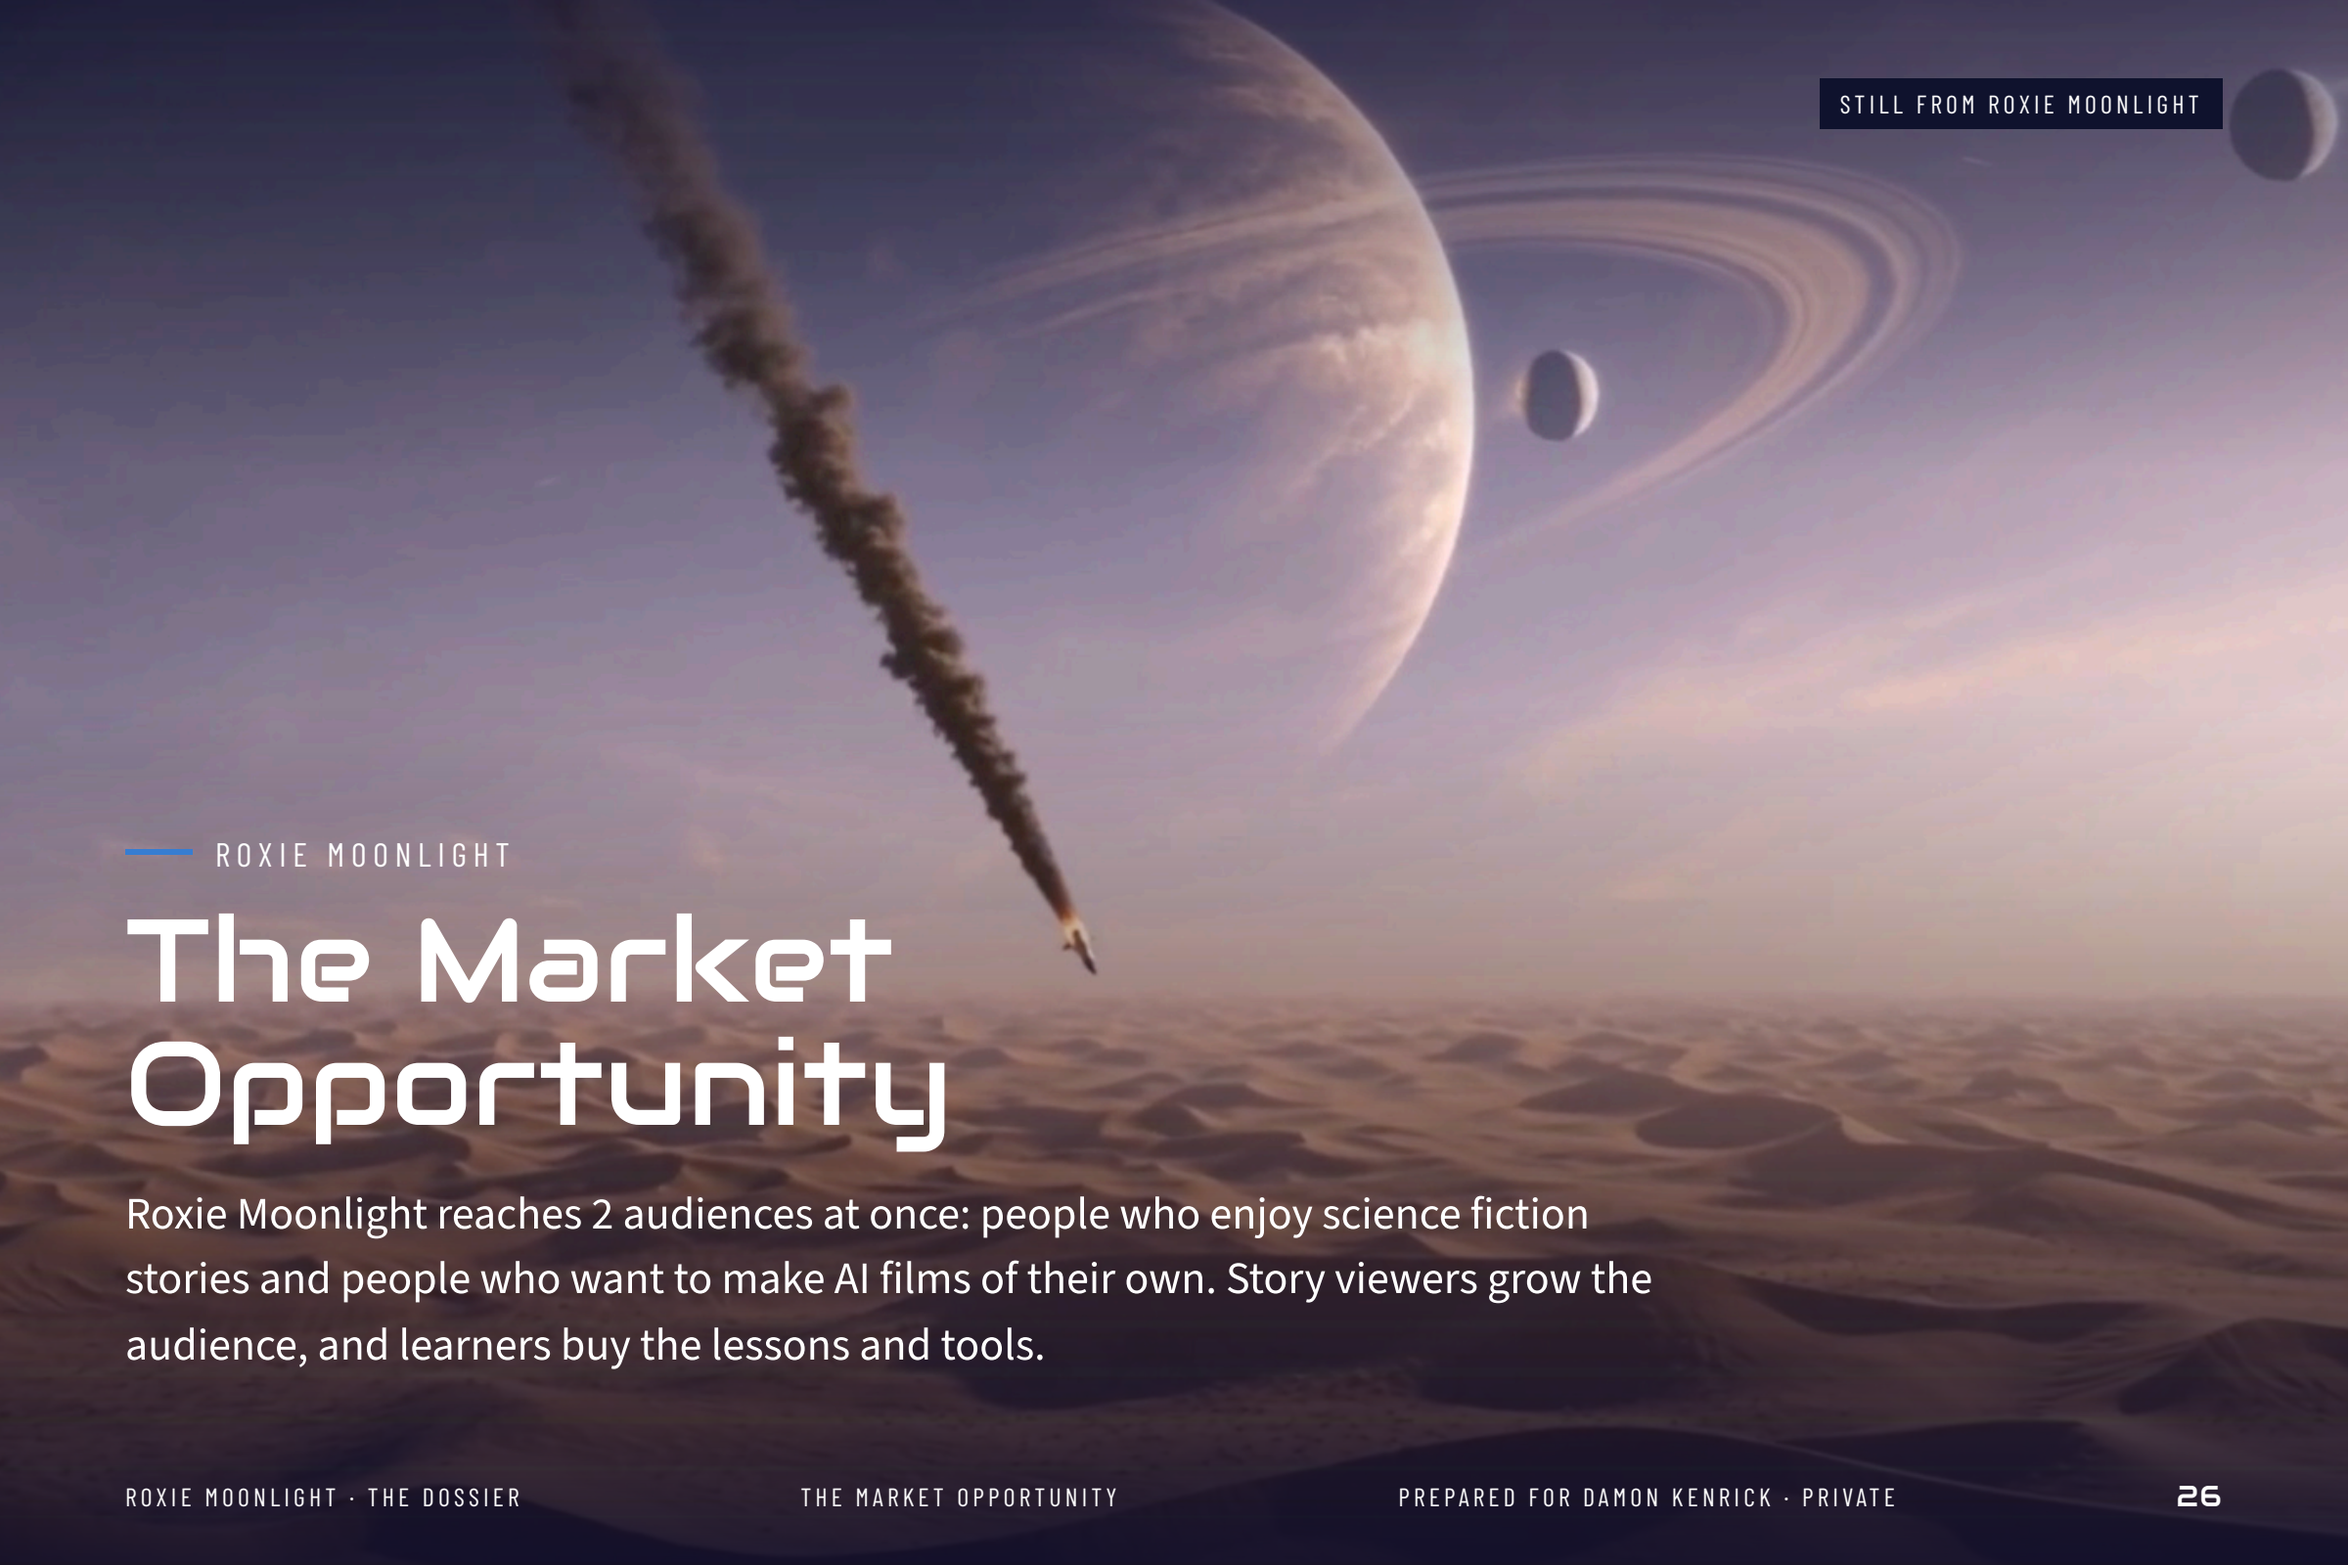

Readable combinations

Use midnight text on white and white text on midnight. Violet on white also has enough contrast for normal text. Use electric blue for graphics or large headings; small blue text needs a darker color.

Font files and licenses

Oxanium, Barlow Condensed and Source Sans 3 are supplied under the SIL Open Font License. Their source files and licenses accompany this Dossier. If a platform cannot use your fonts, use Arial for reading text and check the layout again.

PRIVATE · DAMON KENRICK · 2026

STILL FROM ROXIE MOONLIGHT

ROXIE MOONLIGHT

The Market Opportunity

Roxie Moonlight reaches 2 audiences at once: people who enjoy science fiction stories and people who want to make AI films of their own. Story viewers grow the audience, and learners buy the lessons and tools.

The Market Opportunity

Each audience needs different videos, and both kinds of video come from the same scenes.

Story viewers

These viewers come for Roxie, her world and the next episode. They share scenes, follow the channel, and buy shirts and stickers when they care about the character.

Aspiring AI filmmakers

These viewers want to know how you made the scene. They watch lessons, join communities, and buy templates and courses that save them time.

STILL FROM ROXIE MOONLIGHT

PRIVATE · DAMON K

The Market Opportunity

Tool communities

AI video and voice companies run large official communities. Runway and ElevenLabs both host Discord servers with weekly challenges and contests. Posting Roxie scenes there puts your work in front of people who use the same tools.

Industry attention

Agencies and studios now watch AI short films. The creative team Shy Kids signed with the talent agency UTA after one AI short went viral, and the team now produces work for Disney, HBO, AMC and Netflix.

Brand work

Brands hire AI filmmakers for advertising. Filmmaker Samir Mallal has made AI work for Coca-Cola and Samsung.

Research source

Damon Kenrick Command Center research, September 2026: the Runway and ElevenLabs help centers, and published coverage of Shy Kids and Samir Mallal.

PRIVATE · DAMON KENRICK · 2026

The Niche Gap

Compare what AI film learners can already find, then make the purpose of Roxie Moonlight clear.

Tutorial schools

Schools such as AI Filmmaking Academy and AI Filmmaker's Lab teach tools and techniques. They teach from many short examples instead of one ongoing story.

Tool company tutorials

Runway, ElevenLabs and similar companies teach their own products. Each tutorial covers one tool, so a learner has to work out how the tools fit together.

Single viral shorts

One AI short can draw a large audience, and most creators stop after that video. Viewers have no character to follow and no reason to come back.

Your opening

The research found no one teaching AI filmmaking from one original film they keep making. Roxie Moonlight gives viewers a story to follow and a full production to learn from.

PRIVATE · DAMON KENRICK · © 2026

The Niche Gap

Recommended niche: Building Roxie Moonlight

AI filmmaking taught from one real, ongoing film. Every lesson starts from a Roxie scene and ends with a technique the viewer can use on their own project.

Alternate: character consistency

Keeping a character's face, clothing and style the same across shots is one of the hardest problems in AI video. You could become the teacher known for solving it, with Roxie as the example.

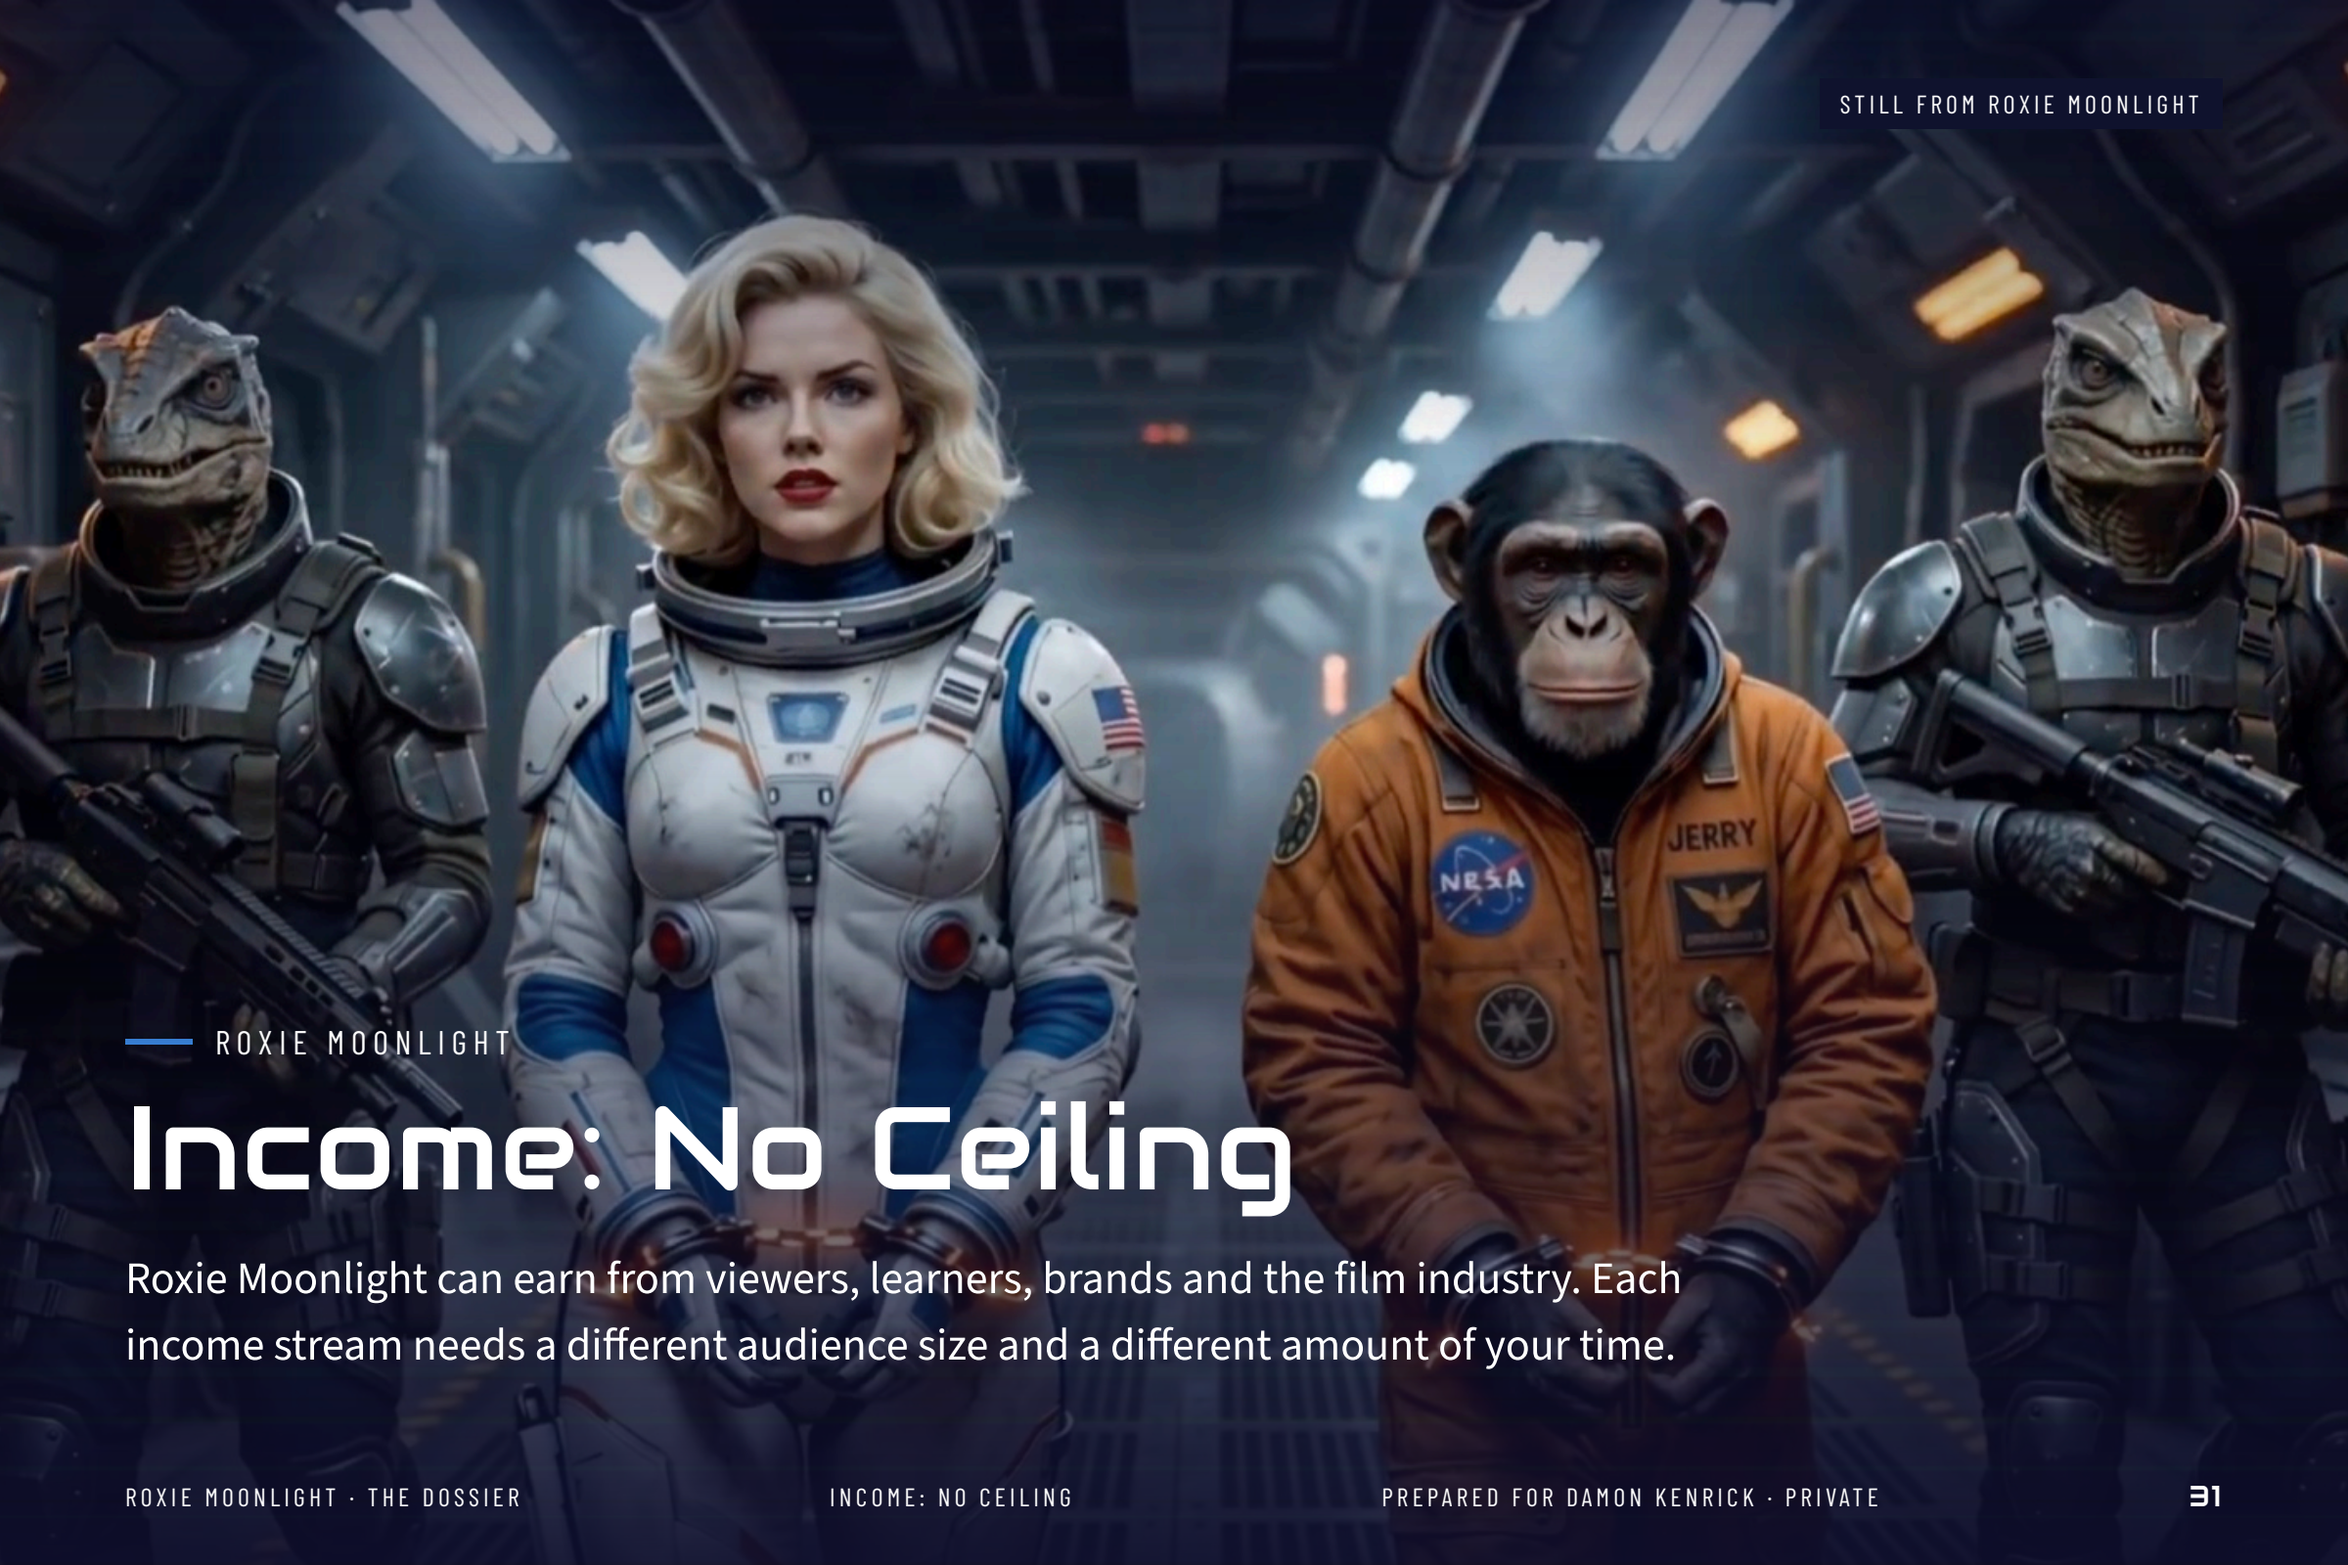

Alternate: Roxie in 3 languages

Release scenes and lessons in English, Spanish and Portuguese. You speak all 3 languages, so you can voice and check every version yourself.

The test

Publish one Roxie scene, one Behind the Scene video and one lesson about the same technique. Compare views, comments and email signups across the 3 videos, then make more of the kind that performs best.

PRIVATE · DAMON KENRICK · ©2026

STILL FROM ROXIE MOONLIGHT

ROXIE MOONLIGHT

Income: No Ceiling

Roxie Moonlight can earn from viewers, learners, brands and the film industry. Each income stream needs a different audience size and a different amount of your time.

STILL FROM ROXIE MOONLIGHT

Income: No Ceiling

These streams start small and grow as the channel grows.

YouTube ad revenue

YouTube shares advertising income with channels in the YouTube Partner Program. Full ad revenue sharing requires 1,000 subscribers and either 4,000 public watch hours in 12 months or 10 million public Shorts views in 90 days.

Supporters and merchandise

A supporter membership can offer deleted scenes, concept art and early episodes for a monthly fee. Roxie shirts, stickers and water bottles let fans show they follow the film.

JON KENRICK · © 2026

Income: No Ceiling

Template and prompt packs

A low cost pack of the prompts, character sheets and settings you use for Roxie helps a learner start faster. A small product like this shows you whether people will pay before you build a course.

Live workshops

An online workshop can teach one technique to a small group in real time. Workshops let you test a lesson and earn from it before you record a full course.

An AI filmmaking course

Your instructional design degree and Articulate Storyline skills let you build a structured course. Teach the full process of making one short scene, from idea to finished cut, with Roxie as the example.

Sponsored lessons

AI tool companies pay creators to show their products in use. A lesson that uses a sponsor's tool on a real Roxie scene gives the sponsor a clear example and gives your viewers a useful lesson.

PRIVATE · DAMON KENRICK · 2026

Income: No Ceiling

Brand commissions

Companies hire AI filmmakers to make short videos and advertisements. Your Roxie scenes work as a portfolio that shows brands your style and your skill.

An illustrative calculation

These numbers show the math, and they are an example rather than a forecast. 200 supporters paying $5 a month bring in $1,000 a month before fees. 50 course buyers at $97 bring in $4,850. Subtract platform fees, refunds and taxes to see what you keep.

Industry representation

A finished, consistent body of work can draw interest from agencies and studios. This path is slow, and it has the highest ceiling of any stream.

What to measure

Track subscribers, watch hours, email signups, product sales and sponsor inquiries each month. Use those numbers to decide which stream to build next.

PRIVATE · DAMON KENRICK · ©2026

Income: No Ceiling

UTA

SHY KIDS

One AI short film by the team Shy Kids went viral, and the team signed with the talent agency UTA. The team now produces work for Disney, HBO, AMC and Netflix.

Coca-Cola

SAMIR MALLAL

Filmmaker Samir Mallal has made AI work for Coca-Cola and Samsung. His work shows that major brands pay for AI film skills.

Blotato

SABRINA RAMONOV

Sabrina Ramonov built a large free AI education audience and then founded the software company Blotato. Her path shows how free teaching can lead to a paid product.

PRIVATE · DAMON KENRICK © 2026

Study how each creator turned visible work into paid work. Then compare their path with the time and audience you have now.

Sources: Damon Kenrick Command Center research, September 2026; blotato.com/about.

What Comes Next

Use this Dossier to choose your next 3 videos and your first product.

Label your videos

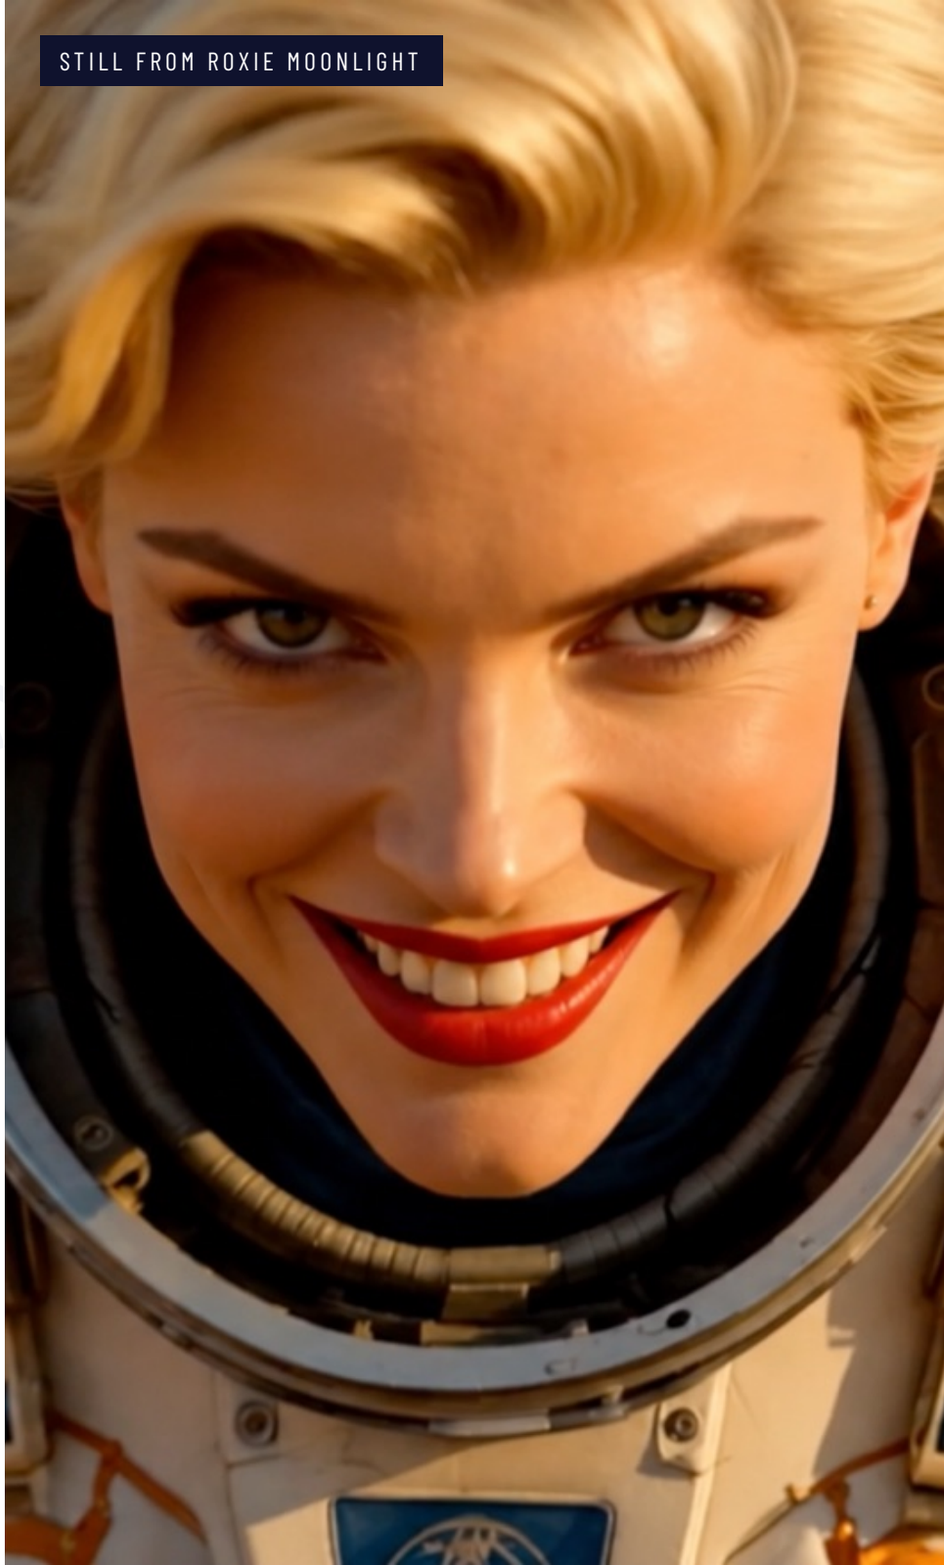

Sort your current uploads into Episode, Behind the Scene and Lesson. Update the titles and thumbnails so each label is easy to see.

Make one full set

Choose one Roxie scene and publish it 3 ways: the finished scene, the story of how you made it and a lesson on one technique from it.

Start an email list

Offer a free Roxie prompt or character sheet in exchange for an email address. An email list lets you reach your audience directly when your first paid product is ready.
